

Product: Wire Seals and Wire

Wire

- 12" 4-ply stainless steel wire to be used with lead or aluminum seals. (Additional lengths available.)

Lead Seals

- Plain lead seals for use with wire to seal any application.
- Softer metal and easier to press than aluminum.
- For all applications, use with our 5" Seal Press.

Aluminum Seals

- Light weight aluminum seal for use in place of lead seals because of weight, temperature, conductivity or no-lead requirement.
- Ideal for aircraft, chemical, etc.

5" Seal Press

- This hand tool can be used to close and emboss. For use with all lead and aluminum wire seals.
- Replaceable 1/2" diameter dies are available blank or engraved with letters, numbers or logos.
- Custom dies engraved with your design.
- Inserted into press, the die will emboss your logo, number, etc. into soft lead seals.
