

Durable Bar Code Labels Become the Foundation of New Warehouse Management System

Camcode Solutions Help Create Defined Warehousing for Building Structure Company

When the structural integrity of a home or building is compromised, this manufacturer of foundation stabilization products finds experienced and knowledgeable contractors to help property owners fix their failing foundations. So where does this U.S. manufacturer go when it needs help with warehouse management solutions? The answer is Camcode.

“The other vendors didn’t have an answer for our floor application, and didn’t have specific industry experience. Camcode had both.”

In addition to its structural repair contractor network, this organization also manufactures and distributes foundation stabilization systems to its network of certified dealers. The company’s main dealer support center warehouses a wide variety of stabilization products and equipment, such as steel foundation supports and hardware for installation. With no automated warehouse management system in place and no sections or designated storage areas assigned, the Omaha warehouse became more of a collection area for all products and equipment.

The manufacturer/supplier wanted to implement a warehouse management system that would allow individual locations within the warehouse. More specifically, they were looking for durable warehouse floor labels to mark each section. During their search, the one name that kept coming up was Camcode.

“We considered other products and other companies,” said the company’s manager of logistics and process improvement. “The other vendors didn’t have an answer for our floor application, and didn’t have specific industry experience. Camcode had both.”

The organization chose Camcode to supply bar code labels for its new warehouse management system. They wanted [warehouse labels](#) that were scannable at various distances, professional in appearance, and would last while resisting warehouse damage. The company selected Camcode’s Multi-Level Rack Labels, Retroreflective [Warehouse Signs](#), and Adhesive [Floor Labels](#).

“We went from virtually one location to 506 locations thanks to Camcode labels,” the manager says. “We can delineate where items are stored, and have better management and control by location.”

All of Camcode’s labels have made an impact on this manufacturer/supplier’s warehousing, especially the adhesive floor labels. “The labels fully met our expectations, and the floor labels exceeded my expectations,” says the manager of logistics and process improvements. “They are easy to apply and meet the exact dimensions for our needs.”

Should this manufacturer of foundation stabilization products need additional warehouse management solutions for other dealer support centers, they will call on Camcode. “Everything went exceptionally well. The labels were perfect, the count was perfect, and delivery was within our expectations,” says the manager of logistics. “I am extremely pleased with my decision to go with Camcode. Their service and quality is exceptional.”

“I am extremely pleased with my decision to go with Camcode. Their service and quality is exceptional.”

Camcode: The Standard for Warehouse Bar Code Labeling

Cost-Effective: Lower system cost and easy installation saves on material and labor costs.

Saves Time: Quicker attachment methods and varied installation options keep projects on deadline.

Compatibility: Proven to integrate easily with leading warehouse management systems.

Easy to Scan: Camcode’s warehouse bar code systems maintain the proper angle for optimum scanning and can be read at distances of up to 30 feet.

Accuracy: Virtually eliminates the errors caused by manual labeling and inventory management.

Efficiency: Track and locate inventory more quickly and easily for greater productivity and reduced labor costs.
