Product: Metalphoto Label

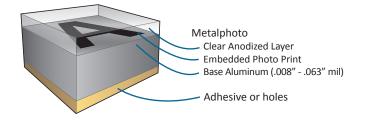

Product Features

- Designed for exceptional durability, image is sealed beneath an anodic layer of the aluminum.
- Superior resistance to chemicals, abrasion, solvents, extreme temperatures and UV.
- Highly readable crisp graphics on black or silver background.
- High-performance adhesives and/or holes for mechanical attachment.

Need an Exceptional Long-Lasting Label?

Description

Camcode's **Metalphoto**® label is designed with superior quality for the most demanding label applications. This label is constructed of an anodized aluminum face stock (thicknesses from .008" to .063"), with a high performance permanent pressure-sensitive adhesive and/or holes for mechanical attachment. The adhesive is

designed to permanently bond to high surface energy metals and plastics, and textured and contoured surfaces. The label has excellent resistance to chemicals, abrasion, solvents, and will withstand exterior exposure in the harshest environments, including extreme cold, heat and UV. When treated with our image intensification process, Metalphoto's expected exterior life exceeds 20 years.

Product Specifications

Material Anodized aluminum face stock (thicknesses from .008" to .063".)

Attachment Permanent pressure-sensitive adhesive and/or holes for mechanical attachment

(also available with low surface energy adhesive.)

Label Copy Several font types are available as well as logos or other design elements.

Symbologies All common symbologies available including code 3 of 9, 12 of 5, 128 and Data matrix.

Colors Black graphics on silver background; color options available.

Standard Sizes Standard and custom sizes available.

Packaging Shipped in sequential order, in boxes. 100% no missing numbers.

Shipment 10 working days from receipt of order and approval of artwork. Expedited shipment is

available for an additional charge.

Metalphoto[®]

Durability Characteristics

| PRODUCT DATA | VALUE | TEST METHOD |
|---|----------------------------------|--|
| Exterior Exposure | No Effect | Using Metalphoto Image Instensification Process, black and silver image exceeds 400 hr. Weatherometer est GG-P-455b, estimated equivalent to 20 yr. exposure |
| Abrasion Resistance | Slight dulling of surface | Taber Abraser with CS17 wheel, a total of 1000 gm. load 7000 cycles |
| Temperature Resistance | 650°F | Using Metalphoto Image Instensification Process |
| Salt Spray | No Corrosion | 5% at 95°F for 700 hrs. |
| Chemical Resistance | | |
| MII-S-3136 111 Hydrocarbon Fluid | No Effect | 1 hr. immersion |
| MIL-L-5161C-Turbine and jet engine fuel | No Effect | 1 hr. immersion |
| JP-4 Fuel | No Effect | 72 hr. immersion |
| Kerosene | No Effect | 12 hr. immersion |
| Skydrol (Hydraulic Fluid) | No Effect | 24 hr. immersion at both room temp. and boiling point |
| Methyl Ethyl Ketone (MEK) | No Effect | 24 hr. immersion |
| Ethyl Acetate | No Effect | 24 hr. immersion |
| Xylol | No Effect | 72 hr. immersion |
| Heptane | No Effect | 72 hr. immersion |
| Ethyl Alcohol | No Effect | 72 hr. immersion |
| Ferric Chloride | No Effect | 10% solution, 16 hr. immersion |
| Ammonium Hydroxide | Slight Dulling | 10% solution, 16 hr. immersion |
| MIL-P-21563 soap solution | No Effect | 16 hr. immersion |
| MIL-C-25179 AIN in heptane | No Effect | 25% solution, 1 min. immersion (cleaning solution) |
| Sulfuric Acid | No Effect | 10% solution, 24 hr. immersion |
| Phosphoric Acid | No Effect | 1% solution, 12 hr. immersion |
| Nitric Acid | No Effect | 3% solution, 72 hr. immersion |
| TSP (Trisodium Phosphate) | No Effect | 1% solution, 40 hr. immersion |
| Sodium Hydroxide | Not Recommended (surface attack) | 1% solution, 1 hr. immersion |

| SPECIFICATION | PUBLICATION | DETAIL | DESCRIPTION |
|-----------------------------------|--|-------------------------------------|--|
| GG-P-455b | Federal Specification | Type I, Grade A or B Class 1 & 2 | Photosensitive anodized aluminum impregnated with silver compounds printable on one or two sides - all finishes and thicknesses. |
| MIL-P-15024D | Military Specification | Type H & G | Totally anodized aluminum with characters integrated into the anodized layer photographically using silver compounds. |
| MIL-P-19834B | Military Specification | Type I or II Style III or IV | Metalphoto .003" thick plates with the proper adhesive applied meets or exceeds all of the performance requirements of this spec. |
| MIL-P-514D | Military Specification | Composition C | Photosensitive aluminum plates, grade and class as specified in federal specification GG-P-455b. |
| Industrial Commercial Products | Original Equipment Panel Fronts Nameplates | Metalphoto Products | Material shall be Metalphoto. Image (black on silver or silver on black shall be sealed into the anodized layer with photosensitive silver compounds) colors other than black may be imbedded by resist or screen process. |
